

Dhruv Ladani

Product Builder | GenAI & AI Systems | o→i Product Development

dhruvladani04@gmail.com | [9429082869](tel:9429082869) | Gujarat, India | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

AI Product Builder with hands-on experience designing and deploying Generative AI applications using multi-agent systems and RAG pipelines. Skilled in translating user needs into product features, defining metrics, and collaborating across engineering and design teams to deliver impactful AI-driven products.

EDUCATION

Product Management and Agentic AI Program,
Indian Institute of Technology, Patna

2025 – 2026 | Online

Bachelor of Technology in Computer Engineering,
Pandit Deendayal Energy University (PDEU), Gujarat
CGPA: 9.4

2022 – 2026 | Gandhinagar, India

PROFESSIONAL EXPERIENCE

Data & Automation Intern, Impresa.ai Consulting

January, 2026 – Present | Ahmedabad

- Partnered with PMs to shape and deliver client proposals, translating business problems into structured product approaches
- Worked closely with stakeholders to define KPIs and scope POCs, leading efforts from problem definition to POC demo delivery
- Designed and refined prompt workflows and metadata structures for a GenAI platform to improve output quality and consistency
- Contributed to ML and data preprocessing tasks, supporting model readiness and experimentation pipelines
- Built Python automation scripts and SQL pipelines for data processing, validation, and reporting workflows

AI/ML Intern, WebMobi360 (B2B AI Products)

May, 2025 – August, 2025 | Remote

- Translated business requirements into user stories, acceptance criteria, and sprint tasks for enterprise AI platforms.
- Integrated Generative AI and LLM workflows to automate operational processes, improving workflow efficiency by approximately 15%.
- Partnered with engineering & design to ship features across sprint cycles.
- Conducted usability testing across three internal applications, reducing navigation-related issues by 20% through iterative feedback.

Mobile App Development Intern, MitJayn Corporation

October, 2024 – December, 2024 | Remote

- Led end-to-end alpha testing program for a healthcare management platform serving patients and providers.
- Created structured test plans, onboarded testers, and consolidated feedback into more than 50 prioritized backlog items.
- Worked closely with stakeholders to define MVP scope, feature prioritization, and release readiness.
- Supported sprint reviews, bug triage, and preparation of release documentation.

PROJECTS

Recruit-AI , AI-Powered Recruitment Platform for SMBs

December, 2025

- Led end-to-end product development from problem identification to MVP demonstration.
- Conducted user interviews with recruiters to uncover inefficiencies in hiring workflows, informing product direction.
- Designed user flows, wireframes, and agent-based hiring workflows using Large Language Models.
- Defined north-star metrics including time-to-hire, screening accuracy, and recruiter productivity.
- Built a product roadmap and prioritized features using the impact versus effort framework.
- Delivered a functional prototype, backend agent architecture, metrics roadmap, and investor-ready pitch deck.

Agile Sprint Guardian , Multi-Agent AI for Sprint Planning

December, 2025

- Developed an Agentic AI system that automates backlog grooming by converting raw feature requests into structured User Stories with Acceptance Criteria.
- Designed the multi-agent architecture where a "Virtual PO" agent prioritizes tasks and a "Virtual Tech Lead" agent estimates technical complexity.
- Reduced sprint planning overhead (simulated) by ~40% by pre-validating requirements before human review.

Smart Job Prep Assistant , AI Resume and Interview Preparation Tool

May, 2025

- Built an AI-driven product that analyzes job descriptions and generates optimized resume bullet points using the STAR framework.
- Prioritized features using impact-effort analysis and defined KPIs such as resume submission rate and time-to-first-draft.
- Reduced average resume drafting time by approximately 35% through automated suggestions and keyword insights.
- Implemented analytics to track user funnel behavior and feature adoption.

SKILLS

Product Management (Product Strategy, Roadmapping, Feature Prioritization, User Research, Backlog Grooming, Sprint Planning, KPI Definition, Metrics Tracking, Stakeholder Management, Wireframing, A/B Testing, Experimentation)

Tools (Jira, Notion, Figma, GitHub, Firebase, Docker)

Technical (Python, JavaScript, Flutter, MERN Stack, Django, SQL, MongoDB)

Analytics (User Funnel Analysis, Retention Metrics, Feature Adoption Tracking, Product Analytics (Mixpanel))

LEADERSHIP & ACHIEVEMENTS

- Tech Head — Computer Society of India, PDEU
- App Development Lead — ACM Student Chapter
- GATE 2025 Qualified (CS/IT)
